Academic Program and Course Description Guide 2024/2025

Introduction:

The educational program is considered a coordinated and organized package of curricula that includes procedures and experiences structured around study units, primarily aimed at building and refining the skills of graduates, making them qualified to meet the requirements of the job market. It is reviewed and evaluated annually through internal or external auditing procedures and programs, such as the external examiner program.

The academic program description provides a brief summary of the key characteristics of the program and its courses, indicating the skills that are being developed in students based on the program's objectives. The importance of this description is evident as it represents the cornerstone for obtaining program accreditation, with contributions from teaching staff under the supervision of the scientific committees in the academic departments.

This third edition of the guide includes a description of the academic program after it has been approved by the Committee of Deans of Colleges of Education for Humanities at Iraqi universities, regarding the curricula based on accreditation requirements. It also includes updates to the sections and items of the previous guide in light of the developments and updates in the educational system in Iraq, which encompasses the traditional academic program description (annual, semester) as well as adopting the generalized academic program description as per the letter from the Ministry of Higher Education and Scientific Research / Studies and Planning Department No. (T M3/2906 on 3/5/2023) concerning programs that fundamentally rely on the Bologna Process.

In this context, we cannot stress enough the importance of writing clear descriptions of academic programs and curricula to ensure the smooth progress of the educational process.

Concepts and Terms:

- Academic Program Description: The academic program description provides a brief overview of its vision, mission, and objectives, including a precise description of the targeted learning outcomes based on specific learning strategies.
- Course Description: It offers a concise summary of the main characteristics of the course and the expected learning outcomes for the student, demonstrating whether they have maximized the available learning opportunities, and it is derived from the program description.
- **Program Vision:** An ambitious image of the future of the academic program, aiming to be a developed, inspiring, stimulating, and applicable program.
- **Program Mission:** It briefly outlines the goals and necessary activities to achieve them, as well as defining the pathways for the program's development and its directions.
- **Program Objectives:** These are statements that describe what the academic program intends to achieve within a specific timeframe and are measurable and observable.
- Curriculum Structure: All the courses/subjects included in the academic program according to the adopted learning system (semester, annual, Bologna process), whether they are requirements (by ministry, university, college, academic department) along with the number of credit hours.
- Learning Outcomes: A coherent set of knowledge, skills, and values that the student has acquired after successfully completing the academic program, and the learning outcomes for each course should be defined in a way that achieves the program's goals.
- Teaching and Learning Strategies: These are the strategies used by faculty members to enhance student teaching and learning. They are plans followed to achieve learning goals, describing all the in-class and out-of-class activities to achieve the program's learning outcomes.

1. Program Vision

Leadership and educational and psychological excellence for building a vibrant community.

2. **Program Mission**

Preparing outstanding teachers and specialized researchers in educational and psychological sciences who are professionally and research-qualified, capable of creativity and competitiveness in the job market, executing effective community partnerships, and providing robust educational and psychological programs, research, and expertise.

3. Program Objectives

The goals and strategies of the college aim for the Department of Educational and Psychological Sciences to achieve the following objectives:

- 1. Contribute to the university's three functions (education, scientific research, and community service).
- 2. Achieve program accreditation according to national standards for accrediting programs in the education field.
- 3. Publish scientific research in local journals and reputable global databases, and prepare researchers to keep up with scientific developments in both the academic and research fields to ensure the acquisition of information from global scientific sources and maintain the momentum of rigorous scientific research.
- 4. Provide a university environment that encourages students' abilities to think creatively and innovatively.
- 5. Prepare students academically, professionally, and culturally, enabling them to understand educational and psychological facts, concepts, and theories, and grasp the fundamental principles that qualify them for teaching, scientific research, and psychological and educational guidance in the Ministry of Education and other social, psychological, and educational institutions.
- 6. Meet community and labor market needs with highly qualified educational and psychological specialists who can solve and address problems according to precise scientific standards.
- 7. Empower students to apply scientific methods in addressing problems and life and professional situations and develop their ability to analyze and evaluate these methods against specific criteria.
- 8. Enable graduates to continue their higher education and adapt to new scientific developments and advancements in educational and psychological sciences, mastering research methodologies.
- 9. Provide educational, psychological, and counseling services to both students and citizens alike in the fields of psychological treatment, educational guidance, and career counseling.
- 10. Build impactful community partnerships that contribute to sustainable development.

4. Program Accreditation

Does the program have program Accreditation? And from which agency? No

5. Other external influences

External influences include many variables that can come from society, the economy, politics, technology, and even culture. Here are some of the most significant external influences:

- 1. Economic trends and needs: The job market greatly impacts the design of academic programs. If there's a need to increase the number of specialists in educational and psychological sciences in a certain area, it leads to the development of programs to meet this need.
- 2. Legal and regulatory requirements: Government regulations and national and regional education policies play a role in setting academic standards such as accreditation, assessment, and quality assurance.
- 3. Technological changes: Technological advancements force academic institutions to update their curricula to include new technologies. For example, the emergence of artificial intelligence has increased the demand for programs related to modern technology.
- 4. Social and cultural trends: Changes in social values and ethical principles also affect academic programs. For instance, the growing interest in environmental issues, sustainable development, and gender equality drives universities to develop programs that focus on these issues.
- 5. Scientific and research developments: New scientific and research discoveries in the field of educational and psychological sciences can influence academic programs, as universities strive to update their curricula based on the latest scientific advancements.
- 6. Education funding: The availability of funding, whether from the government or the private sector, impacts academic programs. Institutions that receive more funding may be able to offer a wider variety of innovative programs.
- 7. Student and parent expectations: The desires and expectations of students and their families regarding quality education and future careers influence the design of academic programs, as institutions seek to meet their aspirations.

All these influences interact with one another to affect how academic programs are designed and implemented, requiring educational institutions to be flexible and able to adapt to the changing environment.

Is there a sponsor for the program? The sponsor of the program: Ministry of Higher Education and Scientific Research, University of Anbar.

8. Expected learning outcomes of the program

Knowledge

Learning outcomes 1 Learning outcomes statement 1

- A1- To gain comprehensive knowledge in the field of educational and psychological sciences and to work towards advancement in both educational and research areas, aligning with the requirements of sustainable development, the digital revolution, and keeping up with the rapid changes in the world.
- A2- To learn the educational and psychological knowledge that enables a scientific understanding and perception to reach the truth, engage in research and inquiry, and develop thinking and reasoning skills to emphasize the principle of learning for knowledge leading to truth.
- A3- To actively participate in knowledge production and leverage more knowledge, information, and skills that enable the acquisition of experience and professionalism, while prioritizing aspects of life to establish the principle of learning for work.
- A4- To possess a high level of specialized knowledge that supports critical analysis and the synthesis of concepts in the field of educational and psychological sciences.
- A5- To practice self-learning skills through lifelong learning and continuous professional development.

Skills

Learning outcomes 2 Learning outcomes statement 2

- B1 To have effective communication skills and the ability to manage teamwork and lead others.
- B2 To demonstrate advanced personal skills in both academic and practical life, clearly representing vision, flexibility, adaptability, initiative, and other personal skills.
- B3 To show mastery and skilled application of specialized and general knowledge in various professional contexts.
- B4 To demonstrate the ability to solve problems and make appropriate decisions in different contexts by using analysis, reasoning, and seeking multiple and innovative solutions, among others.
- B5 To possess effective, responsible, and secure use of modern technologies in academic and professional life by employing analysis and evaluation and applying information and data from various sources to meet their specialized and professional needs.

Ethics

Learning outcomes 3 Learning outcomes statement 3

- C1 To cultivate a sense of responsibility by being aware of the social and legal dimensions of all his behaviors.
- C2 To commit to responsible behavior and embrace Islamic values and national identity.
- C3 To engage in community activities that contribute to the development of their university and local community.
- C4 To uphold professional ethics and conduct by adhering to academic integrity, lifelong learning, fairness and appreciation of diversity, excellence, quality, and discipline, professionalism, and freedom.
- C5 To apply scientific and educational principles that help him to be a contributing and good member of society, believing that every civilization has its own values system, and working

according to the principle of learning to live with others.

9. Teaching and Learning Strategies

Strategies and methods of teaching and learning used in implementing the program in general:

- Active learning strategies.
- Mastery learning strategies.
- Cooperative learning strategies.
- Inquiry-based learning strategies.
- Blended learning strategies.
- E-learning strategies.
- Reflective learning strategies.
- Self-directed learning strategies.

10. Evaluation methods

Implementation at all stages of the program in general.

- Essay performance assessments
- Objective performance assessments.
- Performance tests.
- Questionnaires.
- Observation card.
- Alternative evaluation.

Professional Development

Mentoring new faculty members

Briefly describe the process used to guide new faculty members, visitors, part-time, and full-time faculty at the institutional and departmental levels.

- Conducting informative guidance workshops and courses for new faculty members on various key aspects including:
- 1. Self-development
- 2. Administrative and human resource skills
- 3. Legal skills
- 4. Modern teaching methods
- 5. Scientific skills and academic research
- Actively participating in both theoretical and practical classes under the supervision of experienced and competent instructors in teaching and academic research.

Professional development of faculty members

Briefly outline the plan and arrangements for the academic development of faculty members such as teaching and learning strategies, assessment of learning outcomes, professional development, and more, as the professional development of faculty members is crucial to ensure the improvement of the quality of education and research in educational institutions. There are several ways to achieve this, including:

- 1. Workshops and training sessions: Educational institutions organize workshops and training courses aimed at developing the skills of faculty members in areas such as effective teaching, communication with students, assessment techniques, scientific research, and more:
- Professional development for university lecturers.
- Effective teaching and learning strategies.
- Building achievement tests.

Administrative skills and human resources development.

- Legal skills.
- High-quality scientific publishing in international repositories.
- **2. Guidance and counseling:** Individual support can be provided to faculty members through guidance and counseling sessions aimed at identifying strengths and weaknesses, and developing personal and professional development plans.
- **3. Encouraging and motivating continuous learning:** Incentives and rewards can be provided to faculty members who seek continuous learning and skill development.
- **4. Online learning:** Providing online learning resources such as online courses and educational materials available on the internet can be an effective way to develop the skills of faculty

members at their convenience.

- **5. Engagement in the academic community:** Encouraging faculty members to participate in academic conferences, workshops, and seminars to share experiences and learn from others.
- **6. Research and scholarly publishing:** Encouraging faculty members to conduct research and publish in peer-reviewed scientific journals can contribute to the development of their skills and increase their knowledge in their specialized fields.
- **7. Providing support and opportunities:** Developing faculty members not only benefits their job performance and education quality but also contributes to enhancing the reputation and attractiveness of the educational institution to prospective students and researchers.

12. Acceptance Criterion

The regulations related to enrollment in the college or institute, whether it's central admission or other methods, should be noted.

- The plan for central admission set by the Ministry of Higher Education and Scientific Research/ Department of Studies and Planning: which includes relying on the criteria of preference and competition based on the high school graduation average.
- The applicant must pass a personal interview in front of the specialized committee from the department to prove their mental and psychological fitness.
- A medical examination is required, along with obtaining proof of being medically fit.

13. The most important sources of information about the program

There are several sources to rely on to obtain information about the academic program. Among the most important of these sources are:

- The official website of the university or educational institution: The official website contains comprehensive information about the academic programs offered, including curricula, courses, graduation requirements, research opportunities, and more.
- **Student handbook or academic program catalog:** This guide contains detailed information about the academic program including courses, study plans, and available specializations.
- Faculty and staff: You can communicate with faculty members to obtain information about the academic program, courses, research opportunities, and training.
- University Library: Resources and references can be found to help understand the content of the academic program and deepen knowledge in various subjects.
- Academic Research and Scientific Journals: Reading research and scientific articles published in specialized scientific journals can help understand current trends in the field of study and academic innovations.
- Academic Forums and Discussion Groups: Joining academic forums online or discussion groups to connect with fellow students and professors, and share experiences and knowledge.
- Official Reports and Statistics: Accessing official reports published by the university or educational institutions to obtain data and statistics related to the academic program and its performance.

Using a variety of these sources can help students and faculty members better understand the academic program and make the most of their educational experience or professional development.

14. Program Development Plan

Developing academic programs involves many steps and principles aimed at improving the quality of education, meeting students' needs, and fulfilling the requirements of the job market. SWOT analysis can be used to work in this field. Some of the key steps in developing academic programs are:

- **Assessment of needs and objectives:** It is important to identify the educational needs of students and the requirements of the job market. This includes studying changes in society, industry, and technology.
- **Curriculum design:** A curriculum must be designed that aligns with educational objectives, student needs, and job market requirements. This may involve developing new courses or updating current ones.
- **Implementing innovative teaching methods:** It is essential to employ innovative and interactive teaching methods that encourage active student participation, enhance active learning, and foster critical thinking.
- **Incorporating technology in education:** Technology can be used to enhance the learning experience, such as utilizing online learning platforms and interactive educational, materials.
- **Continuous assessment and improvement:** Regular assessment of the study program must be conducted to ensure the achievement of educational objectives and quality improvement. The evaluation results can be used to introduce necessary enhancements.
- **Providing practical learning opportunities:** Offering practical learning opportunities such as workshops and field training to enable students to acquire relevant practical skills and experiences.
- **Enhancing Diversity and Inclusivity:** The study program should be designed to provide opportunities for all students regardless of their backgrounds and abilities.
- **Providing Academic and Professional Support:** Academic and professional support for students can be offered through counseling sessions, academic guidance, and opportunities to participate in research activities.

Developing the academic program relies on continuous collaboration among faculty members, academic administration, students, and business owners to ensure the highest levels of quality and effectiveness in education.

First Semester / First Year / Academic Year 2024/2025

Description Preparation Date:

16/9/2024

Available Attendance Forms:

Lectures

Number of Credit Hours (Total) / Number of Units (Total)

45 hours/45 credits

Course administrator's name (mention all, if more than one name)

Name: Assistant. professor. Dr. Abdul Majeed Rabie

Email: abdulmagieed.moh@uoanbar.edu.iq

Course Objectives

Course Objectives

- 1- Allow the students to know the principles of general psychology.
- 2- The student will be able to know the factors affecting human behavior.
- 3. The program will help the student to be able to know the trends and tendencies that govern human behavior.
- 4- The students will be able to apply the principles of general psychology he has studied

Teaching and Learning Strategies

Strategy

- Method of discussion and interaction.
- Feedback method.
- Method of giving and receiving
- Assigning the student to some group activities and duties.
- Allocating a percentage of the grade to daily assignments and tests

Course Structure

Week	Hours	Required	Unit or subject	Learnin	Evaluation
		Learning	name	g	method
		Outcomes		method	
the first	3	Receptivity and understandi ng	Introduction to psychology	The lecture	Oral and written tests

Course Description Educational Psychology

Course Title:

Educational Psychology

Course Code:

EHS2102

Semester/Year:

First Semester / Second Year / Academic Year 2024/2025

Description Preparation Date:

16/9/2024

Attendance Options:

In-person, Online

Total Hours / Credits:

60 hours / 30 hours theory + 30 hours practical / (45) credits over one semester

Course Coordinator:

Name: Eng. Zahraa Tariq Battal

Email: ed.zahra.tareq@uoanbar.edu.iq

Course Objectives

Objectives

- Skills development: This science seeks to develop cognitive, social and emotional skills in students.
- Building an effective learning environment: Educational psychology works to create a stimulating and encouraging learning environment.
- Curriculum development: Educational psychology contributes to developing curricula to suit the needs and abilities of learners.

In general, it can be said that the goal of educational psychology is to contribute to the development of the educational process and improve its results, through a deeper understanding of the nature of the learner and the learning process.

To clarify further, here are some examples of how educational psychology is applied:

- Designing individual educational programs: The principles of educational psychology can be used to design educational programs that meet the needs of each individual student.
- Developing interactive teaching methods: These methods can be used to increase student engagement and motivate them to learn.
- Providing a supportive learning environment: A safe and encouraging learning environment can be created that helps students feel confident in themselves and achieve success.
- Solving learning problems: The principles of educational psychology can be used to identify the causes of learning

culties and provide appropriate solutions.				
In short, educational psychology is a valuable tool for				
teachers and educators, as it helps them better understand				
students and improve their learning experience.				
Feaching and Learning Strategies

Assessment of the Course

The score out of 100 is distributed based on the tasks assigned to the student, such as daily preparation, daily oral and written exams, monthly tests, and reports, etc.

The effort score out of (40) is distributed as follows:

20 points for the first monthly exam

15 points for the second monthly exam

5 points for tasks, activities, and student participation					
The final exam score is (60)

Course Name:

Social psychology

Course Code:

EHS2103

Semester/ Year:

First Semester / Second Year / Academic Year 2024/2025

Description Preparation Date:

16/9/2024

Available Attendance Forms:

Lectures

Number of Credit Hours (Total) / Number of Units (Total)

60 hours / 30 hours of theory + 30 hours of practical / (45) units over a semester

Course administrator's name (mention all, if more than one name)

Name: Asst. Prof. Hanan khalid ebrahim Email: hanan.khalid@uoanbar.edu.iq

Course Objectives

Course Objectives

- To know the concepts of social psychology
- To learn about the modern development of social psychology.
- The relationship of social psychology with other sciences
- Learning performance skills that enable the student to learn the concepts of social psychology and employ them in the labor market and social life
- Social skills by opening a group dialogue between students.
- Application of the lesson by students.
- Self-evaluation processes for students

Teaching and Learning Strategies

Strategy

Learning and teaching strategies and methods dependent in implementation of the program in general.

- Brainstorming method.
- Problem-solving method.
- Active learning strategies.
- Cooperative learning methods.

Week	Hour s	Required practical edLearning Outcomes	Unit or subject name	Learning method	Evaluation method
the first	2	Introduction to social psychology, its definition, emergence, historical development and	Introduction to cognitive psychology	Problem- solving	Observatio n

		importance			
The second	2	Psychology among Muslims	Definition of cognitive psychology	Brainstormin g	Observatio n
the third	2	Methods of studying social behavior	Biological foundations of knowledge	Active learning	Portfolio
the fourth	2	What is social and educational upbringing?	Attention	Cooperative learning	Practical reports
Fifth	2	First month exam	perception	Exams	Paper- based
The sixth	2	Socialization	Remembering and forgetting	Discussion	Portfolio
The seventh	2	Social development from childhood to old age	Forgetting	Brainstorming	Performanc e-based assessment
The eighth	2	Self and self- concept, the role of family, school, and friends	Data processing	Cooperative learning	Peer evaluation
The ninth	2	Social diseases (pathology), juvenile delinquency, juvenile trends, images of delinquency	First month exam	Discussion	Peer evaluation
The tenth	2	Causes leading to delinquency Prevention of delinquency	Representing information in the cognitive system	Exams	Paper- based
Eleventh	2	Second month exam	Thinking models memory	Discussion	Scientific reports
Twelfth	2	Social symptoms of mental illness: anxiety, frustration	Thinking styles and cognitive styles	Active learning	Practical reports
Thirteenth	2	Anxiety and frustration	Learning methods and problem solving, language and	Active learning	Practical reports

			thought		
Fourteenth	2	Psychological and social trends: Definition of trends and methods of measuring them	Second month exam	Discussion	Portfolio
Fifteenth	2	Propaganda and the media, the concept of propaganda, its methods and laws, and its impact on behavior	beyond knowledge	Active learning	Reports and presentatio ns

The score out of 100 is distributed based on the tasks assigned to the student, such as daily preparation, daily oral and written exams, monthly tests, and reports, etc.

The effort score out of (40) is distributed as follows:

20 points for the first monthly exam

15 points for the second monthly exam

Course Description Descriptive Statistics /1

Course Name:

Descriptive Statistics /1

Course Code:

EHS2104

Semester / Year:

First Semester / Second Year / Academic Year 2024/2025

Description Preparation Date:

16/9/2024

Available Attendance Forms:

In-person, online

Number of Credit Hours (Total) / Number of Units (Total)

45 of theory / (45) units over a semester

Course administrator's name (mention all, if more than one name)

Name: Dr. Elaf Hamid Mousa

Email: ed.elaf.hamid@uoanbar.edu.iq

Course Objectives

Course Objectives

- Understanding the concept of statistics, its importance, purpose of use, and types.
- Identifying samples, their types, and variables and their types.
- Exploring measures of central tendency and when a distribution is normal or skewed.
- Knowing measures of dispersion and determining the best measure to describe data, whether grouped or ungrouped.
- Understanding relationship measures and grasping the meaning of the values relied upon by the correlation coefficient and its interpretation.

Teaching and Learning Strategies

Strategy

- Discussion method.
- Statistical problem-solving method.
- Active learning strategies (inquiry).
- Cooperative learning strategies. Cooperative learning methods.

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
the first	2 theoretical 2 practical	Acquiring concepts of educational	A general introduction to educational and	Problem- solving	Observatio n

		statistics	psychological statistics		
The secon	2 theoretical 2 practical	Understanding measures of central tendency	Variables – their types – classification, levels of measurement	Brainstormi ng	Observatio n
the third	2 theoretical 2 practical	Knowing measures of dispersion and methods of extraction	Frequency distributions: pie charts, frequency polygons, histograms	Active learning	Portfolio
the fourth	2 theoretical 2 practical	Gaining skills in extracting simple correlation coefficients	Measures of central tendency: mean	Cooperativ e learning	Practical reports
Fifth	2 theoretical 2 practical	Familiarizing with correlation coefficients (partial – multiple) /	Median, mode	Exams	Paper- based
The sixth	2 theoretical 2 practical	Understanding inferential statistics and types of statistical tests	Measures of dispersion: range, mean deviation	Discussion	Portfolio
The sevent	2 theoretical 2 practical	Knowing methods to test correlation coefficients	Variance, standard deviation	Brainstormi ng	Performanc e-based assessment
The eighth	2 theoretical 2 practical	Knowing types of t-tests and methods of extracting them	Measures of relationship and correlation	Cooperativ e learning	Peer evaluation
The ninth	2 theoretical 2 practical	Recognizing analysis of variance (ANOVA) tests, their conditions, extraction steps, types, and post hoc tests /	Pearson correlation coefficient	Discussion	Peer evaluation

The tenth	2 theoretical 2 practical	Identifying post hoc tests and their types /	Spearman correlation coefficient	Exams	Paper- based
eleven th	2 theoretical 2 practical	Learning about non-parametric tests, their types, and conditions for use	Phi correlation coefficient	Discussion	Scientific reports
Twelft h	2 theoretical 2 practical	Understanding the Mann- Whitney test, its extraction method, and conditions for use	Kendall correlation coefficient	Active learning	Practical reports
Thirte enth	2 theoretical 2 practical	Getting to know the Wilcoxson test, its conditions for use, and types	Interpreting correlation coefficient values	Active learning	Practical reports
fourte enth	2 theoretical 2 practical	Learning about Kruskal's test, its conditions, and extraction steps	Hypothesis testing concerning correlation coefficients	Discussion	Portfolio
Fiftee nth	2 theoretical 2 practical	Post hoc test	Interpretation tables, coefficient of determination, and alienation coefficient	Active learning	Reports and presentatio ns
The secon	2 theoretical 2 practical	Acquiring concepts of educational statistics / s	A general introduction to educational and psychological statistic	Inquiry and research	Scientific reports

The score out of 100 is distributed based on the tasks assigned to the student, such as daily preparation, daily oral and written exams, monthly tests, and reports, etc.

The effort score out of (40) is distributed as follows:

20 points for the first monthly exam

15 points for the second monthly exam

5 points for tasks, activities, and student participation

Course Description	Developmental	Psvchology -	Childhood

Course De	escription Developmental Psychology – Childhood				
Course Title:					
Developmental Psyc	hology/1 (Childhood)				
Course Code:					
EHS2105					
Semester/Year:					
First Semester / Seco	ond Year / Academic Year 2024-2025				
Date of Description	on Preparation:				
16/9/2024					
Attendance Optio	ons:				
In-person, Onl	line				
Total Hours / Cre	edits:				
60 hours / 30	0 hours theory + 30 hours practical / (45) credits over one				
semester					
Course Coordinat	tor:				
Name:	Assistant Lecturer Taysir Omar Hi				
Email: taeser.l	hnde@uoanbar.edu.iq				
Course Objective	·S				
Objectives	- To introduce students to the nature and objectives of				
_	developmental psychology.				
	- To provide students with the philosophical foundations of				
	developmental psychology and familiarize them with the				
	principles of child development as proposed by Rubin.				
	- To inform students of the importance of both heredity and the				
	environment in human development, as well as the impact on				
	children if one aspect is neglected. Students will also be made				
	aware of the dangers of comparing one child to another.				
	- To equip students with a range of methods and tools that				
	psychologists use to study developmental phenomena in detail.				
	- To explore developmental issues during childhood and				
	methods of addressing them.				
	- To study the role of the family in education and development,				
	as discussed in Mohammed Al-Sadr's book The Family in				
	Islam.				
	- To guide students through various developmental issues and				
	methods of monitoring and resolving them.				
- To develop the necessary skills for working with children and					
	meeting their needs.				
Teaching and Learni	ng Strategies				
Strategies	Dialogue and discussion strategy.				
	Brainstorming technique.				
	Problem-solving methods.				
	Active learning methods.				

Cooperative learning techniques.					
Course S				I

Course Description The crimes of the Baath regime

Course Name:

Crimes of the Ba'ath Regime in Iraq

Course Code:

UNV05

Semester / Year:

First Semester / Second Year / Academic Year 2024-2025

Date of Description Preparation:

16/9/2024

Available Attendance Forms:

Lectures.

Number of Credit Hours (Total) / Number of Units (Total)

30 hours/(2) hours per week/(30) units during a semester.

Course administrator's name (mention all, if more than one name)

Name: M.M. Noor Wadah Satea

Email: noorwadah0@uoanbar.edu.iq

Course Objectives

Course Objectives

- 1-1. Introducing students to the crimes of the Baath Party in Iraq.
- 2. Providing students with the serious human rights violations committed by the Baath Party in Iraq.
- 3. A detailed explanation of the crimes committed by the Baath Party in Iraq.
- 4. Explaining the truth about the Baath Party, which committed the most heinous crimes against the Iraqi people.

Teaching and Learning Strategies

Strategy

- Teaching and learning strategies and methods adopted implementing the program in general, including:
- - Dialogue and discussion strategy.
- Directed exploration strategy.
- - Strategy for showing documentary and illustrative films.
- - Brainstorming strategy.

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method

Course Description Personality Psychology /1

Course Name:

Personality Psychology /1

Course Code:

EHS3102

Semester / Year:

First Semester / Third Year / Academic Year 2024-2025

Date of Description Preparation:

16/9/2024

Available Attendance Forms:

In-person, online

Number of Credit Hours (Total) / Number of Units (Total)

45 of theory / (45) units over a semester

Course administrator's name (mention all, if more than one name)

Name: Ass. Pro. Abdulkarim Obaid Jumaa (Ph.D)

Email: ed.abdulkarim.obeid@uoanbar.edu.iq

Course Objectives

Course Objectives

- 1- To know the concepts of personality science.
- 2- To learn about the modern development of personality psychology.
- 3- To understand how heredity affects personality.
- 4- To understand how the environment affects personality.
- 5- To learn about methods of measuring personality.committing to the ethics of education.

Teaching and Learning Strategies

Strategy

Learning and teaching strategies and methods dependent in implementation of the program in general.

- Brainstorming method.
- Problem-solving method.
- Active learning strategies.
- Cooperative learning methods

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
the first	3 theory	Receiving and Understandi ng	The concept of personality in psychological heritage	Lecture	Observatio n
The	3	Receiving	Personality	Lecture	Observatio

second	theory	and Discussion	determinants		n
the third	3 theory	Receiving and Discussion	Personality dynamics	Lecture	Achieveme nt file
the fourth	3 theory	Receiving and Discussion	Dimensions of personality construction	Lecture	Practical reports
Fifth	3 theory	Receiving and Discussion	Dimensions of personality growth	Lecture	Practical reports
The sixth	3 theory	Receiving and Discussion	Personality growth theories	Lecture	Achieveme nt file
The seventh	3 theory	Receiving and Discussion	Personality assessment	Lecture	Performanc e-based alternative assessment
The eighth	3 theory	Receiving and Discussion	Theoretical foundations for personality assessment	Lecture	Peer assessment
The ninth	3 theory	Receiving and Discussion	Personality assessment methods	Lecture	Peer assessment
The tenth	3 theory	Receiving and Discussion	Psychological measurement	Lecture	Achieveme nt file
Elevent h	3 theory	Receiving and Discussion	Educational measurement	Lecture	Peer assessment
Twelfth	3 theory	Receiving and Discussion	Personality measurement tools	Lecture	Performanc e-based alternative assessment
Thirtee nth	3 theory	Receiving and Discussion	Psychological tools	Lecture	Practical reports
Fourtee nth	3 theory	Receiving and Discussion	Educational tools	Lecture	Achieveme nt file
Fifteent h	3 theory	Receiving and	Clinical tools	Lecture	Achieveme nt file

Course Evaluation						
The distribution of the grade out of 100 according to the tasks assigned to the student such as daily preparation, daily, oral, monthly, written exams, reports, etc.						

The distribution of the grade out of 100 according to the tasks assigned to the student such as daily preparation, daily, oral, monthly, written exams, reports, etc.

The final grade is (100), distributed as follows:

- 1. Daily preparation and writing a report (5)
- 2. First afternoon exam (20)
- 3. Second month exam (15)
- 4. Final exam (60)

Learning and Teaching Resources	
Required textbooks (curricular books	 Personality Psychology and Its Theo
any)	Abdul Karim Obaid
Main references (source)	 Practical education and its applications in - Personality Psychology: Aziz Hanna and Nazem Hashim Al-Abidi Personality: Theory, Evaluation, Research Methods: Naima Al-Shamaa Personality Theories: Duane Schutranslated by Al-Karbouli and Al-Qaisi.
Recommended books and references (scientific journals, reports)	Lectures in Personality Psychology.

Course	Description	physiological	psychology

Course Name:

physiological psychology

Course Code:

EHS3103

Semester / Year:

First Semester / Third Year / Academic Year 2024-2025

Date of Description Preparation:

16/9/2024

Available Attendance Forms:

In-person, online

Number of Credit Hours (Total) / Number of Units (Total)

60 hours / 30 hours of theory + 30 hours of practical / (45) units over a semester

Course administrator's name (mention all, if more than one name)

Name: Asst. Prof. Ammar Awad Farhan Al-Obaidi (Ph.D)

Email: ed.ammar. awad@uoanbar.edu.iq

Course Objectives

Course Objectives

- Introducing students to the objectives and topics of physiological psychology.
- Watching educational films that explain the work of the human nervous system
- Introducing students to the parts of the nervous system and their functions
- Learning about the work of hormones and their effect on behavior
- Introducing students to the physiological mechanism of sleep and how the brain works during sleep
- Explaining the importance of motives in human behavior and their physiological mechanism in work.

Teaching and Learning Strategies

Strategy

- Teaching and learning strategies and methods adopted in implementing the program in general
- Dialogue and discussion strategy.
- Presentations, cooperative sessions, active learning methods.
- Cooperative learning methods..

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
	3	Learn about the	Definition of	Discussion,	Written
the first	Theory	nature of	physiological	dialogue,	oral
		physiological	psychology and its	presentations	examinatio
		psychology and	main topics	,	ns, note

		its main topics		collaborative sessions, and working papers	card
The second	3 Theory	Learn about the nature of the nerve cell and its characteristics	The nerve cell and its characteristics	Discussion, dialogue, presentations , collaborative sessions, and working papers	Written oral examinatio ns, note card
the third	3 Theory	A detailed explanation of the work of the nerve cell and its types	Types of nerve cells	Discussion, dialogue, presentations , collaborative sessions, and working papers	Written oral examinatio ns, note card
the fourth	3 Theory	Learn about the nature of the work of the nerve connection	The nerve junction (synapse)	Discussion, dialogue, presentations , collaborative sessions, and working papers	Written oral examinatio ns, note card
Fifth	3 Theory	Learn about the peripheral nervous system	The peripheral nervous system	Discussion, dialogue, presentations , collaborative sessions, and working papers	Written oral examinatio ns, note card
The sixth	3 Theory	Learn about the nature of the nerves, their classification and how they work	Nerves and their classification	Discussion, dialogue, presentations , collaborative sessions, and working papers	Written oral examinatio ns, note card

The seventh	3 Theory	Explaining the somatic and autonomic nervous system and the difference between them in function and mechanism of work	The somatic and autonomic nervous system	Discussion, dialogue, presentation s, collaborativ e sessions, and working papers	Written oral examinations, note card
The eighth	3 Theory	Learn about the nature of the central nervous system, its function and mechanism of work	The central nervous system	Discussion, dialogue, presentation s, collaborativ e sessions, and working papers	Written oral examinatio ns, note card
The ninth	3 Theory	Explaining the work of the spinal cord and its function and the processes it controls.	The spinal cord and reflex action	Discussion, dialogue, presentation s, collaborativ e sessions, and working papers	Written oral examinatio ns, note card
The tenth	3 Theory	A detailed explanation of the brain sections and the function of each	The main parts of the brainand planning domain, teaching domain, assessment domain	Discussion, dialogue, presentation s, collaborativ e sessions, and working papers	Written oral examinatio ns, note card
eleventh	3 Theory	Explaining the nerve flash and its mechanism of work and the effect of neurotransmitt ers on human mood and behavior Learn about	The nerve flash and neurotransmitters and its types Epilepsy and its	Discussion, dialogue, presentation s, collaborativ e sessions, and working papers Discussion,	Written oral examinatio ns, note card Written

	Theory	epilepsy in	types	dialogue,	oral
		terms of its		presentation	examinatio
		symptoms, methods of		s, collaborativ	ns, note card
		diagnosis and		e sessions,	card
		treatment		and working	
				papers	
	3	A detailed		Discussion,	Written
	Theory	explanation of		dialogue,	oral
		the endocrine		presentation	examinatio
		glands and the		S,	ns, note
		function of the		collaborativ	card
		glandular		e sessions,

TOTAL TRANSPORT OF CHILD DECIDE HAIRO DOMINING TOTAL	Week Hours	Required Unit or subject name Learning Evaluation		

		Learning Outcomes		method	method
the first	2 Theory 2 Practica	Acquiring the concepts of experimental psychology	Development of the experimental study of behavior	Dialogue and discussion strategy.	Note
The second	2 Theory 2 Practica 1	The student applies an experimental research with two experimental groups	Experimental research, experimental and non-experimental designs	Cooperative learning methods	Note
the third	2 Theory 2 Practica 1	The student learns about the problem of the experimental research steps	Steps of experimental research (selecting the problem, research hypotheses, types of research hypotheses, experimental plan)	Active learning	Daily Exam
the fourth	2 Theory 2 Practica 1	The student distinguishes the variables of experimental research and methods of controlling them	Meaning of variables, types of variables, controlling variables, goals of controlling variables	Collaborativ e Learning	Practical
Fifth	2 Theory 2 Practica 1	Acquiring the skill of experimental design and learning how to control the internal integrity of the experimental design	Experimental Safety Experimental and Concomitant Events	Problem Solving	Reports
The sixth	2 Theory 2	Acquiring planning skills and	External Safety of Experimental Design (Test Biases, Pretest	Problem Solving	Written articles

	Practica 1	learning how to create	Experimental Procedures,		
	1	lesson plans	Assumptions of Subjects		
The seventh	2 Theory 2 Practic al	Gaining the ability to formulate and analyze objectives	First Month Test	Test	Monthly evaluation
The eighth	2 Theory 2 Practic al	Staying updated with modern knowledge in communicat ion and interaction	Controlled experimental design (interview - pairing - with random distribution)	Cooperative Learning	Self- evaluation
The ninth	Theory 2 Practic al	Acquiring field application skills	Randomized control group design with cardiac and post-test, four-group random selection design	Active Learning Methods	Peer Assessmen t
The tenth	2 Theory 2 Practic al	Grasping the fundamental s of teaching competencie s and their areas	Randomized control group design with post-test only	Brainstormin g	Testing
elevent h	2 Theory 2 Practic al	Gaining essential teaching skills	Factorial designs	Active Learning	Peer Assessmen t
Twelfth	2 Theory 2 Practic al	Gaining essential teaching skills	Different designs	Cooperative Learning	Performanc e-Based Alternative Assessmen t
Thirtee nth	2 Theory 2 Practic al	Applying educational technology in the observation lesson	Non-randomized control group design with pretest and posttest	Active Learning	Process Reports

fourtee nth	2 Theory 2 Practic al	Acquiring classroom management skills	Assigning students to an experimental research starting from formulating the title to analyzing the results	Homework	Written articles
Fifteent h	2 Theory 2 Practic al	Acquiring field application skills	Second month test	Test	Monthly rating

The score out of 100 is distributed based on the tasks assigned to the student, such as daily preparation, daily oral and written exams, monthly tests, and reports, etc.

The effort score out of (40) is distributed as follows:

20 points for the first monthly exam

15 points for the second monthly exam

5 points for tasks, activities, and student participation

Course Description Educational techniques and educational technology/1

Course Name:

Educational techniques and educational technology/1

Course Code:

EDH3105

Semester / Year:

First Semester / Third Year / Academic Year 2024-2025

Date of Description Preparation:

16/9/2024

Available Attendance Forms:

Lectures

Number of Credit Hours (Total) / Number of Units (Total)

45 hours/45 credits

Course administrator's name (mention all, if more than one name)

Name: Asst. Prof. dr. Sabah Abdul Sattar Ahmed

Email: saahmed@uoanbar.edu.iq

Course Objectives

Course Objectives

- Introducing students to educational techniques and educational technology, its origins and history.
- Informing students of the importance of educational techniques and educational technology in the educational process.
- Providing students with the skills of using educational techniques and educational technology in practice

Teaching and Learning Strategies

Strategy

Learning and teaching strategies and methods dependent in implementation of the program in general.

- Presentation strategy
- Discussion strategy
- Brainstorming strategy
- Exploration strategy

Course Description Teaching methods

Course Name:

Teaching methods

Course Code:

EHS3106

Semester / Year:

First Semester / Third Year / Academic Year 2024-2025

Date of Description Preparation:

16/9/2024

Available Attendance Forms:

In-person, online

Number of Credit Hours (Total) / Number of Units (Total)

60 hours / 30 hours of theory + 30 hours of practical / (45) units over a semester

Course administrator's name (mention all, if more than one name)

Name: Dr. Majed Latif Abdul Razzaq

Email: majid.abdulrazaq@uoanbar.edu.iq

Course Objectives

Course Objectives

- Preparing competent staff in the field of educational and psychological sciences in Iraq, regionally and globally.
- Contributing to the development of personnel working in the field of educational and psychological sciences in state institutions and departments Training students on organized scientific observation procedures; how to prepare for observations, schedule their tasks, execute them, evaluate them, and prepare reports about them.
- Spreading educational and psychological awareness and holding awareness seminars in this field.
- Trying to deliver the material in the easiest ways, and spreading the culture of e-learning (distance learning)
- Understanding the materials and clarifying them according to the vocabulary of the curriculum
- Using easy methods to deliver the material.
- Understanding students' tendencies toward clarification, revealing and identifying individual differences, and trying to deal with them accurately

Teaching and Learning Strategies

Strategy

Learning and teaching strategies and methods dependent in implementation of the program in general.

- Brainstorming method.
- Problem-solving method.
- Active learning strategies.
- Cooperative learning methods.

Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
the first	2 Theory 2 Practica	Improve students' understanding of concepts and study materials	Teaching and its foundations	Problem solving	Observatio n
The second	2 Theory 2 Practica	Receiving and discussing	Learning and teaching	Brainstormin g	Observatio n
the third	2 Theory 2 Practica	Providing with good teaching foundations	Foundations of good teaching	The lecture	Observatio n
the fourth	2 Theory 2 Practica	Increase student participation in class and discussions	Basic principles in teaching	The lecture	Real-time tests
Fifth	2 Theory 2 Practica	Identify the elements of the teaching process	Identify the elements of the teaching process	The lecture	Observatio n
The sixth	2 Theory 2 Practica	Providing with modern knowledge of teacher characteristics	Characteristics of a successful teacher	The lecture	Daily exams
The seventh	2 Theory 2 Practica	Discussion and reception	Pillars of the teaching process	The lecture	Observatio n
The eighth	2 Theory 2 Practica	Equipping yourself with modern trends in teaching	Basic principles in teaching	The lecture	Oral exams
The ninth	2 Theory 2 Practica	Identify teaching methods and their types	The concept of teaching methods and their types	Discussion method	Observatio n

The tenth	2 Theory 2 Practica	Increase student participation in class and discussions	The difference between the concepts of strategy, method and method	Brainstormin g	Observatio n
Eleventh	2 Theory 2 Practica	Knowing the factors affecting methods	Knowing the factors affecting methods	Active learning	Peer evaluation
Twelfth	2 Theory 2 Practica	Learn about teaching, curriculum and method	Teaching, curriculum and method	Cooperative learning	Performanc e-based alternative assessment
Thirteenth	2 Theory 2 Practica	Receiving and discussing	Educational goals	Active learning	Practical reports
Fourteent h	2 Theory 2 Practica	Acquire the skill of formulating and analyzing goals	Classification of behavioral goals	Brainstormin g	Performanc e-based alternative assessment
Fifteenth	2 Theory 2 Practica	Increase student participation in class and discussions	The importance of studying Bloom's taxonomy for educational objectives	The lecture	Observatio n

Distributing the score out if 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports,...etc.

The final grade is out of 100, and it's distributed as follows:

- 1. First month test 20 points
- 2. Second month test: 15 points
- 3. Daily preparation: 5 points
- 4. Exam score at the end of the course 60 points

Course Description Measurement and Evaluation/1

Course Name:

Measurement and Evaluation/1

Course Code:

EHS4102

Semester / Year:

First Semester / The fourth Year / Academic Year 2024-2025

Description Preparation Date:

16/9/2024

Available Attendance Forms:

In-person, online

Number of Credit Hours (Total) / Number of Units (Total)

45 of theory / (45) units over a semester

Course administrator's name (mention all, if more than one name)

Name: Ass. Pro. Bilal tariq hussein (Ph.D)

Email: : Bthussain@uoanbar.edu.iq

Course Objectives

Course Objectives

- 1- The student should know the basic concepts of measurement and evaluation.
- 2- The student should be able to build the test map.
- 3- The student should be able to know the types of test vocabulary and the rules for formulating and correcting them.
- 4- The student should be able to conduct statistical analysis of the paragraphs.
- 5- The student should be able to apply what he has studied from the measurement and evaluation material in building valid and accurate test vocabulary.

Course Description Special Education

Course Name:

Special Education

Course Code:

EHS4106

Semester / Year:

First Semester / The fourth Year / Academic Year 2024-2025

Description Preparation Date:

16/9/2024

Available Attendance Forms:

In-person, online

Number of Credit Hours (Total) / Number of Units (Total)

60 hours / 30 hours of theory + 30 hours of practical / (45) units over a semester

Course administrator's name (mention all, if more than one name)

Name: omar Khalaf Rasheed (Assistant Professor)

Email: : okrashed@uoanbar.edu.iq

Course Objectives

Course Objectives

- Introducing students to the importance of special education
- Introducing students to the principles of special education
- Introducing students to categories of people with special needs
- Enabling students to distinguish between categories of people with special needs
- Enabling students to acquire skills in educational dealing with groups of people with special needs

Teaching and Learning Strategies

Strategy

Learning and teaching strategies and methods dependent in implementation of the program in general.

- Brainstorming method.
- Problem-solving method.
- Active learning strategies.
- Cooperative learning methods.

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
the first	2 Theory 2 Practica	Introduction and general idea Basic definitions of	Introducing the student to the basics of special education	Problem- solving	Observatio n

	1	the subject of special Education			
The second	2 Theory 2 Practica	Introduction to people with special needs	Introducing the student to individuals with special needs	Brainstor ming	Observatio n
the third	2 Theory 2 Practica 1	Special education goals	Introducing the student to the general goals of special education	Active learning	Achieveme nt file
the fourth	2 Theory 2 Practica	Talent and creativity	Introducing the student to the concept of gifted and creative people	Collaborat ive learning	Practical reports
Fifth	2 Theory 2 Practica	Mental disability	Introducing the student to the concept of the disabled and mentally retarded	Problem- solving	Practical reports
The sixth	2 Theory 2 Practica 1	Learning difficulties	Introducing the student to the concept of slow learners and those who fall behind in school	Discussion method	Achieveme nt file
The seventh	2 Theory 2 Practic al	Hearing impairment	Introducing the student to the concept of the hearing impaired and the hearing impaired	Brainstor ming	Performanc e-based alternative assessment
The eighth	2 Theory 2 Practic al	Written exam	Testing students' skills	Collaborat ive learning	Peer assessment
The ninth	2 Theory 2 Practic al	Visual impairment	Introducing the student to the concept of blind and visually impaired people	Discussion method	Peer assessment

The tenth	2 Theory 2 Practic al	Hosting models for people with special needs	Introducing the student to the psychological and behavioral characteristics of some groups of people with special needs	Brainstor ming	Achieveme nt file
elevent h	2 Theory 2 Practic al	Behavioral and emotional disorders	Introducing the student to the concept of emotionally and behaviorally disturbed people	Active learning	Peer assessment
Twelfth	2 Theory 2 Practic al	Communicati on disorders	Introducing the student to the concept of troubled people communicating with society	Collaborat ive learning	Performanc e-based alternative assessment
Thirtee nth	2 Theory 2 Practic al	Physical and health disabilities	Introducing the student to the concept of the physically disabled and those with severe chronic diseases	Active learning	Practical reports
fourtee nth	2 Theory 2 Practic al	Autistic disorder	You were expelled from the study of Taha and the concept of independence, as it was distinguished by its reputation	Discussion method	Achieveme nt file
Fifteent h	2 Theory 2 Practic al	Written exam	Testing students' skills	Collaborat ive learning	Achieveme nt file

The score out of 100 is distributed based on the tasks assigned to the student, such as daily preparation, daily oral and written exams, monthly tests, and reports, etc.

The effort score out of (40) is distributed as follows:

20 points for the first monthly exam

15 points for the second monthly exam

5 points for tasks, activities, and student participation

The final exam score is (60)

Course Description Practical Education - Observation

Course Name:

Practical Education - Observation

Course Code:

EDH4107

Semester / Year:

First Semester / The fourth Year / Academic Year 2024-2025

Description Preparation Date:

16/9/2024

Available Attendance Forms:

In-person, online

Number of Credit Hours (Total) / Number of Units (Total)

60 hours / 30 hours of theory + 30 hours of practical / (45) units over a semester

Course administrator's name (mention all, if more than one name)

Name: Prof. Yasir Khalaf Rasheed (Ph.D)

Email: dr.yasir.alshojairi@uoanbar.edu.iq

Course Objectives

Course Objectives

- Introducing students to the goals and content of the school application.
- Providing students with practical aspects individually or collaboratively in preparing and planning model lessons in the field of educational and psychological sciences.
- Training students on organized scientific observation procedures; how to prepare for observations, schedule their tasks, execute them, evaluate them, and prepare reports about them.
- Dividing students into groups so that each group carries out all observation tasks in one school across different educational levels.
- Identifying teaching problems in educational and psychological sciences and analyzing and evaluating their curricula.
- Reviewing and discussing evaluative reports of the school application from previous years and guiding students to read the necessary books and references to assist in executing school application tasks.
- Watching educational programs and films, evaluating them, and benefiting from their results in their teaching activities during the observation and training phase.
- Acquiring the necessary skills for successful teaching and committing to the ethics of education.

Teaching and Learning Strategies

Strategy

Learning and teaching strategies and methods dependent in implementation of the program in general.

- Brainstorming method.
- Problem-solving method.
- Active learning strategies.
- Cooperative learning methods.

Description of the course Developmental Psychology/2 (Adolescence)

Course name

Developmental Psychology/2 (Adolescence)

Course Code

EHS2203

• Semester/year

Second Semester/Second Year/Academic Year 2024-2025

• The date of preparing this description

16/9/2024

• Available forms of attendance

In-person, online

• Number of Credit Hours (Total) Number of Units (Total)

60 hours / 30 theoretical hours + 30 practical hours/ (45) units during a semester

• Course administrator's name (if more than one name)

Name: mr. Tayseer Omar Hindi Email: <u>taeser.hnde@uoanbar.edu.iq</u>

• Course Objectives

Course Objectives

- Introduce students to developmental psychology
 adolescence and its goals.
- Providing students with information about the stages of an individual's transition from childhood to adolescence, including changes.
- Briefing students on the importance of both genetics and the environment in the process of human development and the extent of its impact on the adolescent if we neglect one aspect and make them aware of the risk of adolescence on the adolescent's personality.
- Provide students with a set of mechanisms and methods used by the psychologist in his study of the developmental phenomenon in detail.
- Identify adolescent developmental problems and ways to resolve them.
- Studying the role of the family in education in

- growth, as stated in the book of Muhammad al-Sadr, The Family in Islam
- Guide the student to many developmental problems and ways to follow up and solve them.
- Acquire the necessary skills in dealing with adolescents and meeting their needs.

• TEACHING AND LEARNING STRATEGIES

Strategy

Teaching and learning strategies and methods adopted in the implementation of the program in general

- Brainstorming Debating and discussing
